This table represents a sample of courses offered by the Environmental Studies program. Each row provides detailed information about the course, including the instructor's name, contact information, category, course name, degree level, course code, and a brief course description.
For Students

Message from the Dean

For students at Tohoku University, we have long advocated three principles of "Research First", "Education First", and "Cultural Environmental Studies Course". Our university is known for its commitment to "Research First", which emphasizes the importance of conducting cutting-edge research in various fields.

About GSES

The Graduate School of Environmental Studies is intended to create a research system that not only focuses on the fundamental nature of our environment but also explores the complex interactions between human society and nature. Through this approach, "GSES" will aim to foster future leaders who can responsibly and sustainably manage environmental issues.

Department of Environmental Studies for Advanced Society

The Department of Environmental Studies for Advanced Society focuses on the development of sustainable societies by integrating environmental studies with other disciplines such as humanities, social sciences, and natural sciences.

Department of Cultural Environmental Studies

The Department of Cultural Environmental Studies aims to provide students with a comprehensive understanding of cultural aspects of environmental studies, including the historical, social, and cultural dimensions of environmental issues.

Department of Frontier Science for Advanced Environment

This department aims at an education to nurture human resources with an ability to manage advanced environmental problems. Students will learn about the latest technologies and methodologies to address environmental challenges.

Department of Information Sciences for Environment (Sato Lab.)

Enrolled in 2014, Sri Lanka

Applying for a university in Japan is a challenging process, and understanding the unique aspects of Japanese academic institutions is crucial.

Philosophy

We believe in the importance of environmental studies for cultivating a sustainable society. Our department aims to develop students who can contribute to the advancement of environmental science and technology.

Research

Our department conducts research in various areas, including environmental policy, economic valuation, and environmental education. We strive to find solutions to current environmental challenges and contribute to the creation of a sustainable future.

International Post-Graduate Program in Human Security

Tohoku University started "the International Joint Educational Program in Human Security" from April 2005, by linking the Cultural Studies and the Graduate School of Agricultural Science, the Graduate School of Medicine, the Department of International Law, the Interdisciplinary Graduate School of Human Security, and the School of Global Governance. This program provides education and training in the interdisciplinary study of global security issues, and aims to contribute to the development of a more secure and just world.

For Research

Research at Tohoku University is driven by a commitment to the discovery of new knowledge and the advancement of human understanding. Our faculty members and graduate students collaborate closely to explore fundamental principles and contribute to society.

Office Informal Science

The Office Informal Science promotes research and development in informal science education, aiming to enhance public understanding of science and technology in society.

About FSE

The Faculty of Science Education at Tohoku University focuses on the development of science education and the training of future educators. Our faculty members work to improve science education through research and curriculum development.

International Environmental Leadership Program (IELP)

This international program provides a unique opportunity for students to gain valuable experience in environmental leadership and policy-making. Through hands-on projects and internships in Japan and other countries, students develop practical skills and leadership abilities.

Global Environmental Studies Course

The Global Environmental Studies Course is designed to foster a comprehensive understanding of environmental issues and promote interdisciplinary research. Students learn about the latest scientific advancements and their implications for global challenges.

International Joint Educational Program in Human Security

This program aims to educate students with the knowledge and skills necessary to address global security issues. Students are exposed to various disciplines and gain hands-on experience in real-world projects.

Applied Environmental Studies Course

The Applied Environmental Studies Course focuses on practical applications of environmental science. Students gain expertise in environmental policy, management, and technology transfer, preparing them for careers in environmental consulting and education.

Cultural Environmental Studies Course

The Cultural Environmental Studies Course emphasizes the cultural dimensions of environmental studies. Students explore the interconnections between human society and the environment.

International Joint Educational Program in Human Security

This program offers an interdisciplinary approach to human security, addressing global challenges such as peace, security, and sustainable development. Students participate in real-world projects and gain insights into the complexities of global security.

Institute of Social Sciences

The Institute of Social Sciences at Tohoku University focuses on the study of human societies and their interactions with the environment. Our faculty members conduct research in various fields, including cultural studies and social sciences.

International Joint Educational Program in Human Security

This program prepares students for careers as global leaders in human security. Through a combination of academic study and practical experience, students develop a deep understanding of global issues related to peace and security.

International Joint Educational Program in Human Security

This program aims to educate students with the knowledge and skills necessary to address global security issues. Students are exposed to various disciplines and gain hands-on experience in real-world projects.
