Think globally, Act locally.

The Institute of Graduate School of Environmental Studies, Tohoku University was established in the spring of 2000, in order to train leaders in environmental studies, to promote interdisciplinary research, and to work in an international and collaborative spirit. This unique research institute has the mission of creating a new generation of leaders for a sustainable society. This is accomplished through an international and collaborative spirit. This is accomplished through an international and collaborative spirit. This is accomplished through an international and collaborative spirit.

One of the most important missions of the Institute is to equip our society with the tools necessary to ensure that our society is prepared for a sustainable future. We believe that the future of our society is dependent on the development of new and innovative solutions. Our approach is to foster a culture of innovation and entrepreneurship through carefully planned educational programs.

Environmental problems have spread from local and regional boundaries to the global scale. The world as we know it is facing unprecedented challenges and opportunities. The future of our planet is dependent on the decisions we make today. It is our responsibility to ensure that our actions today do not compromise the future of our children and future generations.

In order to address these challenges, we must work together across disciplines and borders. Our approach is to foster a culture of innovation and entrepreneurship through carefully planned educational programs. We believe that the future of our planet is dependent on the decisions we make today. It is our responsibility to ensure that our actions today do not compromise the future of our children and future generations.
